

## CryptoGuard is searching for development talents in core/security department

Do you want to work as a developer in successful, fast growing international company with customers all over the world? Then CryptoGuard is the right choice for you!

### Information about CryptoGuard and the open positions

CryptoGuard is a developer and vendor of Conditional Access System (CAS) and Digital Rights Management (DRM) system for digital television. CryptoGuard uses a high-grade encryption scheme for its Advanced Security card-based and cardless solutions to meet the demands of service providers, broadcasters and pay-tv operators. CryptoGuard was established in 2007 in Sweden and has since then been an accepted and recommended solution for DVB encryption services all over the world. Currently, CryptoGuard has customers in more than 40 countries and sales offices in Sweden, France, Poland, Peru, India and Rwanda.

We are looking for more developers to our core and security development department. You will work close with experts in the field of digital TV security in areas like CAS and DRM. You will work in a solid company that are growing fast, offering you a secure position, and to become an expert working in the forefront of content protection. Our offices are in Motala and Luleå, Sweden.

### Work tasks:

- Design and develop new features and products.
- Code review and testing of code.
- Maintain existing code.
- Take part of the entire development process from exploring requirements to delivery.

### We are looking for a person with:

- More than 5 years of experience.
- Free criminal track record, no felonies.
- Good track record of completed projects.
- Experience within areas like virtualizations, RTOS'es, network technology, embedded systems design, crypto algorithms, databases and Linux environments like Centos and Debian.
- Software development experience with C/C++, SQL, shell scripting and object-oriented programming.
- A special interest in security and wants a future carrier in content protection.
- Experience from CAS, DRM, SoC programming and digital electronics is a benefit.
- Writing and talking English fluent. More languages are a benefit.
- You are a self-driven person that can easily understand new things and feels that you are the person that makes things happen.

### What we can offer you:

- A position in an international company with customers all over the world.
- An open-minded and supportive environment.
- An opportunity to stay in the forefront of content protection technology.
- A secure position in a growing company with good financial results.
- Working with a team of the best security developers in the world.

In case you have any questions regarding the position or want to apply, please send an email to [work@cryptoguard.com](mailto:work@cryptoguard.com)
