CryptoPLAY OTT - End-to-End IPTV/OTT solution

The complete solution is developed fully in-house by CryptoGuard, ensuring high reliability and eliminating the need for complex and costly third-party integrations, while giving operators full control over the entire workflow. This makes CryptoPLAY OTT a cost-effective, time-saving, and easy-to-deploy on-premise IPTV/OTT solution. The solution also offers exceptional scalability with a pay-as-you-grow business model, making it ideal for operators of any size.

CryptoPLAY OTT delivers an enhanced viewer experience with advanced TV features such as Live TV, Time-Shift, Catchup, Start-Over, nPVR, and VOD. CryptoGuard's multi-DRM is included, supporting Widevine, FairPlay, and PlayReady, ensuring highly secure content delivery. These DRMs are natively supported by browsers, mobile devices, Smart TVs and set-top boxes, and are approved by major studios.
