

Artmotion selects CryptoGuard CAS

Artmotion, a leading Kosovo based Cable TV operator, has selected CryptoGuard CAS as its new content security platform.

Motala, Sweden, June 11, 2018 – CryptoGuard, a provider of content protection for digital TV on any platform, announces that Artmotion, a leading Kosovo-based Cable TV and Internet service provider, has changed its CAS to CryptoGuard. The CAS solution enables Artmotion to cost-effectively secure its content and offers a future-proof platform for growth and deployment of next generation services as their market evolves.

“Artmotion decided to work with CryptoGuard because of fast support, a friendly customized interface, new features, a lower cost of implementation and an easy integration with other systems” says Fatmir Sefa, CTO at Artmotion

Krzysztof Wieczorek, Sales Director East-Central Europe: “We are very happy to add Artmotion to our customer base and increase our market share in the Balkan region. CryptoGuard CAS enables Artmotion to secure its content revenues and offers a high flexibility to improve the viewer experience.

Kjell Carlswärd, CEO at CryptoGuard adds: “Artmotion is a new addition of major TV operators in Balkan region to choose CryptoGuard CAS for their content security needs. This proves the appeal of a highly scalable, feature-rich and cost-effective CAS supporting both card-based and cardless client devices for any platform DVB, IPTV and OTT”.

About Artmotion

Artmotion is one of the leading companies in Cable TV and Internet services in Kosovo. Artmotion possesses the most modern network in the country and is well known for its qualitative products and services. Artmotion also launched the first Kosovo based TV platform, with over 14 own channels including Sports, Movies, Entertainment etc.

About CryptoGuard

CryptoGuard is a leading developer and vendor of Conditional Access System (CAS) and Digital Rights Management (DRM) system for digital television. CryptoGuard uses a high-grade encryption scheme for its card-based and cardless solutions to meet the demands of service providers, broadcasters and operators. CryptoGuard’s flexibility, adaptability and customization with a ‘pay-as-you-grow’ business model makes it a viable option for any size of operator to digitise their TV services and secure content revenues.

CryptoGuard was established in 2007 in Sweden and has since then been an accepted and recommended solution for DVB and IPTV encryption services all over the world. Currently, CryptoGuard CAS has been deployed in more than 50 countries with a number of national operators selecting CryptoGuard as its security partner.
